

## **Id : fd-131**

Result : False Positive

Sink statement : Line 480,484 and 492 in below screenshot is the sink statement can be possible sink statements.

```
477     try {
478         player.setDataSource(c, s.tone_url);
479     } catch (IOException e) {
480         Log.e(TAG, msg: "Failed loading tone: " + e.toString());
481         try {
482             player.setDataSource(c, Settings.System.DEFAULT_NOTIFICATION_URI);
483         } catch (IOException e2) {
484             Log.e(TAG, msg: "Failed loading backup tone: " + e2.toString());
485         }
486     }
487
488     try {
489         player.prepare();
490         player.start();
491     } catch (IOException | IllegalStateException e) {
492         Log.e(TAG, msg: "prepare failed: " + e.toString());
493     }
494
```

However all there get respective exception messages hence can be considered constant strings.
