

Id : ds-1315

Result : False Positive

Reason :

Sink Statement : Line 673 in the below screenshot. The variable 'options' passed to sink statement is generated at line 667 and is an object generated by the Android BitmapFactory class, hence its not tainted. The other variable is the constant Boolean.FALSE.

```
660
661 public GameThread(SurfaceHolder surfaceHolder) {
662     //Log.i("frozen-bubble", "GameThread()");
663     mSurfaceHolder = surfaceHolder;
664     Resources res = mContext.getResources();
665     setState(stateEnum.PAUSED);
666
667     BitmapFactory.Options options = new BitmapFactory.Options();
668
669     /*
670      * The Options.inScaled field is only available starting at API 4.
671      */
672     try {
673         Field f = options.getClass().getField( name: "inScaled");
674         f.set(options, Boolean.FALSE);
675     } catch (Exception ignore) {}
676
```
