Id : fd-56

Result : False Positive

Sink statement : Line 275 in below screenshot is the sink statement.

```
272
273    private void snoozeAll(long snoozeUTC) {
274      if (activeAlarms == null) {
275        Log.w(TAG,  msg: "No active alarms when snoozed");
276        return;
277      }
```

Both variables to the sink statement are constant.

```
388
389    private static final String TAG =
390      AlarmNotificationService.class.getSimpleName();
```

Source Statement : Line 54 in following screenshot

```
49
50 @  public Alarm(Cursor c) {
51      time = c.getInt(c.getColumnIndex(AlarmClockProvider.AlarmEntry.TIME));
52      enabled = c.getInt(c.getColumnIndex(
53        AlarmClockProvider.AlarmEntry.ENABLED)) != 0;
54      label = c.getString(c.getColumnIndex(AlarmClockProvider.AlarmEntry.NAME));
55      repeat = c.getInt(c.getColumnIndex(
56        AlarmClockProvider.AlarmEntry.DAY_OF_WEEK));
57      next_snooze = c.getLong(c.getColumnIndex(
58        AlarmClockProvider.AlarmEntry.NEXT_SNOOZE));
59    }
60
```
