SOURCE
PostFormActivity.java
setViews()
nameField,
emailField,
passwordField,
sageChkBox,
custommarkChkbox
subjectField,
commentField
Line 426

data not passed directly,
but the views initialised in
SOURCE are accessed
in the block on right

PostFormActivity.java
saveSendPostModel()
*[All the views mentioned in the
SOURCE block, are used to add data
in sendPostModel. This
sendPostModel is then added into
draftscache]*
Line 552

Data from the views
instantiated in SOURCE
block are passed on to the
SINK.
Thus, the flow is classified
as True Positive

PostFormActivity.java has a method send()
which first calls saveSendPostModel() [block on top]
and later starts a service. sendPostModel object is passed to the
service, which is first instantiated by saveSendPostModel()

SINK
PostFormActivity.java
send()
Intent.putExtra(...sendPostModel)
